BENCHWORTHY / BREAD BOW KNIFE

Rev 4: slim tapered-handle outline - page 1 of 2 - US Letter, landscape

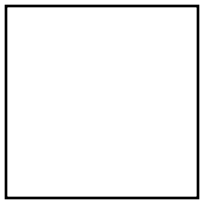

Print at ACTUAL SIZE / 100%. Disable fit-to-page. Verify the 1-inch square.

Overlap the pages using both registration cross pairs. Do not stretch the paper.

TOP VIEW: flat wooden bow. Blade mounts on narrow front edges, perpendicular to this page.

No pilot-hole marks are included. Example blade spacing is 10 1/4 inches; measure your hardware.
The outline does not establish blade preload, screw engagement or a tested mounting arrangement.

CHECK: this square must measure exactly 1 x 1 inch.

If either direction is wrong, correct printer scaling before using the pattern.

Keep the full plan with this template. Prototype requires actual blade-fit validation.
